

If only every flaw were this easy to detect

The first 100% reliable 360° defect detection system

Bumps, neckdowns, splits, frays, bubbles inclusions, contamination-they're all easy to spot. The new Takikawa powered TM-DSS High Speed In-Process Flaw Detection system is designed to meet today's quality challenges. Ideal for wire, cable, glass rods, catheter, optical fiber and many more.

**We make flaws easy to spot.
