## PRECAUTIONS FOR PROPER USE

Refer to [p.1135](#) for general precautions.

This product is not a safety sensor. Its use is not intended or designed to protect life and prevent body injury or property damage from dangerous parts of machinery. It is a normal object detection sensor.

### Enclosure earthing

• RT-610-20□ is capacitor earthed to increase noise immunity. Use the attached insulation fitting (accessory) in case of the following.

(RT-610-10□ and RT-610-50 do not require the insulation fitting because of floating earth.)

★ If there is equipment, such as an ultrasonic welder, spot welder, etc., generating high frequency noise near the sensor and the sensor is mounted on an electric conductor such as metal.

Further, do not supply power from a power supply incorporating an auto-transformer (single winding transformer), since this is dangerous.

### Others

- The output does not incorporate a short-circuit protection circuit. Do not connect it directly to a power supply or a capacitive load.
- Do not use during the initial transient time (50 ms) after the power supply is switched on.
